REPLY TO
ATTN OF: CRZWD RI 677

SUBJECT:

to: Mr. Milton D. Rosenau
Perkin-Elmer Corporation
Norwalk, Connecticut

Dear Mr. Rosenau:

Reference is made to your 7 October 1959 letter and your recent telephone conversation with Mr. Norman Sissenwine of this Directorate, concerning information on the variability in height of isobaric surfaces located between 80 and 120 thousand feet, required in connection with work being done under Contract AF 33(600)-37827.

The attached study has been prepared in reply to this request. If you feel more detailed or additional data are required, we recommend that you arrange to visit this Directorate so that we can obtain a clearer picture of your requirements. It would be appreciated if you would provide us with the name and address of your contract monitor.

Sincerely,

M. B. GILBERT
Chief, Systems and Applications Branch
Programs Division
Geophysics Research Directorate
